

# HEED 3 - PRODUCT BRIEFING

Models 175-001 and 300-001

Model 200-003

Model 4500-001

- (A) Regulator Body** - Our simple rugged design utilizes the same time proven technology found in typical regulators used by SCUBA Divers around the world. Our always-on (no on/off valve), breathe on demand, balanced single stage regulator is easy to use, maintain and service. HEED 3 can be used in any orientation, even upside down.
- (B) First Stage Regulator** - The first stage reduces the high pressure within the cylinder to an intermediate pressure utilized by the second stage.
- (C) Second Stage Regulator** - The second stage provides air at ambient pressure and normal breathing through the mouthpiece. Heed 3 can be used in any orientation, even upside down.
- (D) On/Off Valve** - Twist valve to turn the air supply on and off.
- (E) Serial Number** - Located on the regulator.
- (F) Pressure Indicator** - Dial Gauge Pressure Indicator has an easy to read, color coated display for at-a-glance pressure check in psi and bar.
- (G) Purge Button** - Clears the regulator and empties the Air Tank.
- (H) Mouthpiece** - High Quality silicone mouthpiece.
- (I) Flexible Braided Hose** - Durable Hose reaching from Cylinder to Regulator.
- (J) Burst Disc & Plug Assembly** - Protects unit from over-pressurization. Internal on Model 175-001 & 300-001.
- (K) Refill Port & Cap** - Heed 3 is refillable from an air compressor, hand pump or full scuba tank.
- (L) 3000 PSI Aluminum Cylinder** - Original manufacture date is stamped on the neck. The cylinder should be hydrostatically tested every 5 years based on this date.
- (M) 4500 PSI Aluminum Cylinder** - Original manufacture date is stamped on the neck. The cylinder should be hydrostatically tested every 5 years based on this date.
- (N) VIP Sticker** - Month and year of the last cylinder visual inspection, required every year when refilling HEED 3 at a dive shop.
